Cloud Backup Summary

About the Service

Cloud Backup provides a proven effective cloud-based backup solution, designed and built to suit the needs of SME's and delivered from Australian-based cloud infrastructure.

Service accessibility

- ✔ NETGEAR ReadyNAS Devices
- ✔ Windows (BackupAssist, etc.)
  - Any backup software supporting the RSYNC protocol
  - Linux Servers
  - Mac OSX Servers

You can learn more about Cloud Backup on our website.
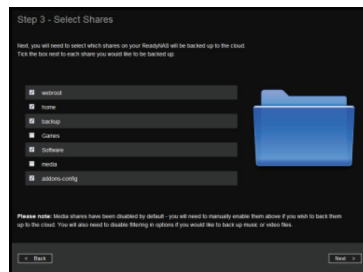

Built for Australia

- ✔ Cloud backup has a number of key advantages over competing systems:
- ✔ Data on-disk seeding and restoration
- ✔ Private IP interoperability (with unlimited transit)
- ✔ Fully differential and compressed online backup
- ✔ Full compliance with data sovereignty regulations

Cloud Backup for ReadyNAS

Did you know you can directly connect your NETGEAR ReadyNAS to cloud backup offering?

We provide a direct integration add-on for all X86 ReadyNAS devices (PRO and rack mount series) that allows direct interconnection.
